NAVY DEPARTMENT

BUREAU OF AERONAUTICS

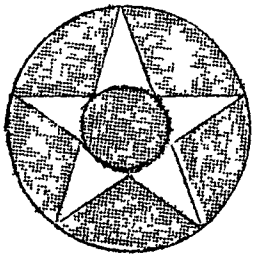

MONTHLY REPORT

STATUS

OF

NAVAL AIRCRAFT

THIS REPORT IS A SUMMARY OF THE GENERAL STATUS OF NAVAL AIRCRAFT, AS SHOWN BY THE RECORDS IN THE BUREAU OF AERONAUTICS ON

DECLASSIFIED by authority of Op-51 ltr 23 July 1965 action by Blanche Snyder Op51

JAN 31 1941

NOTE

As the Bureau's records depend upon receipt of reports from the various aviation activities, some of which are several weeks in transit, and as aircraft, which have been wrecked, lost or worn out in service, are included until officially stricken from the Navy list, it is impossible to show the actual status of aircraft on any given date.

Since the Bureau's records are changing continually any other reports not prepared at the same time, probably will not agree with this report.

INDEX

	PAGE
Aircraft in Overhaul - (San Diego, Norfolk, N.A.F., Pearl Harbor, Coco Solo)	47-52
Airplanes on Hand - NAVY & RESERVES	1,2,3&4
Alameda, Naval Air Station (Operating)	45
Annapolis	39
Anacostia	38
Aircraft Scouting Force Pool, Recapitulation	25
Asiatic Fleet (HOUSTON, MARBLEHEAD, HERON, PatWing Ten (VP-101 & VP-102), LANGLEY, and Navy Yard, Cavite)	35
Atlantic Fleet (Recapitulation)	32
Battle Force, Cruisers	17
Battle Force (Battleships) PENNSYLVANIA, CALIF., Etc.)	17
Base Force, Recapitulation	27
Cape May, N.A.S	37
Carrier Division One	18
Carrier Division Two	18-20
Commander Aircraft, Battle Force (SARATOGA, LEXINGTON, YORKTOWN, ENTERPRISE & Squadrons)	18-20
Commander Aircraft, Scouting Force	23&24
Commander BatShip Div. Five	28
ComAirAtlantic Fleet (ComCarDiv. Three, RANGER, WASP & Squadrons)	29&30
Commander Cruisers, Atlantic Fleet (LOUISVILLE & CHESTER)	28
Commander Cruisers, Scouting Force (INDIANAPOLIS, Etc.)	22
ComDesAtlantic Fleet (OMAHA & NOA)	28
Commander Atlantic Fleet	28
Commander Utility Unit, Base Force (RIGEL)	26
Cruiser Division Seven	28
Coco Solo, Naval Air Station (Operating)	46
Corpus Christi, N.A.S	43
Dahlgren	39
Flotilla One & Two, DESTROYERS, Battle Force (RALEIGH & DETROIT)	18
Jacksonville, N.A.S	40
Lakehurst, L.T.A. & H.T.A	37
Link Trainers on hand, Location of	58
List Showing Type & Model Engine Installed in Class & Model Airplanes	59&60
Location of Experimental Airplanes - Grouped by Models	14
Location of Naval Airplanes - Grouped by Models,	5-13
Location of Naval Reserve Airplanes - Grouped by Models	15&16
Miami, N.A.S	41
Miscellaneous	53&54
Naval Aircraft Factory, VX-3D4, VX-4D4	36&37
NAF, Overhaul	51
Naval Reserve Aviation Units	55-57
Newport	36
Norfolk, Naval Air Station (Operating)	40
Pacific Fleet, Recapitulation	21
Patrol Wing One, Two & Four	23&24
Patrol Wing Three & Five	30&31
PatWing Ten	33
Pearl Harbor, Naval Air Station (Operating)	46
Pensacola, Naval Air Station	42,43&44

PAGE

Quantico, 1st Marine Aircraft Group..... 34&39

NAVY DEPARTMENT

BUREAU OF AERONAUTICS

MONTHLY REPORT

STATUS

OF

NAVAL AIRCRAFT

THIS REPORT IS A SUMMARY OF THE GENERAL STATUS OF NAVAL AIRCRAFT, AS SHOWN BY THE RECORDS IN THE BUREAU OF AERONAUTICS ON

FEB 28 1941

NOTE

As the Bureau's records depend upon receipt of reports from the various aviation activities, some of which are several weeks in transit, and as aircraft, which have been wrecked, lost or worn out in service, are included until officially stricken from the Navy list, it is impossible to show the actual status of aircraft on any given date.

Since the Bureau's records are changing continually any other reports not prepared at the same time, probably will not agree with this report.

NAVY DEPARTMENT

BUREAU OF AERONAUTICS

MONTHLY REPORT

STATUS

OF

NAVAL AIRCRAFT

C.O. M.A.
PENS. [illegible]
1941 APR 17 PM 1 12
RECEIVED

THIS REPORT IS A SUMMARY OF THE GENERAL STATUS OF NAVAL AIRCRAFT, AS SHOWN BY THE RECORDS IN THE BUREAU OF AERONAUTICS ON

MAR 31 1941

NOTE

As the Bureau's records depend upon receipt of reports from the various aviation activities, some of which are several weeks in transit, and as aircraft, which have been wrecked, lost or worn out in service, are included until officially stricken from the Navy list, it is impossible to show the actual status of aircraft on any given date.

Since the Bureau's records are changing continually any other reports not prepared at the same time, probably will not agree with this report.

BUREAU OF AERONAUTICS

AVIATION STATISTICS SECTION

FILE COPY

MONTHLY REPORT

STATUS

OF

NAVAL AIRCRAFT

DECLASSIFIED by authority of Op-51 on 23 July 1955 action by Banske Snyder Op-511

THIS REPORT IS A SUMMARY OF THE GENERAL STATUS OF NAVAL AIRCRAFT, AS SHOWN BY THE RECORDS IN THE BUREAU OF AERONAUTICS ON

APR 30 1941

S-P438

NOTE

As the Bureau's records depend upon receipt of reports from the various aviation activities, some of which are several weeks in transit, and as aircraft, which have been wrecked, lost or worn out in service, are included until officially stricken from the Navy list, it is impossible to show the actual status of aircraft on any given date.

Since the Bureau's records are changing continually any other reports not prepared at the same time, probably will not agree with this report.

NAVY DEPARTMENT

BUREAU OF AERONAUTICS

AVIATION STATISTICS SECTION

FILE COPY

MONTHLY REPORT

STATUS

OF

NAVAL AIRCRAFT

DECLASSIFIED by authority of Op-51 on 13 July 1945 action by Blanche Snyder Op-511

THIS REPORT IS A SUMMARY OF THE GENERAL STATUS OF NAVAL AIRCRAFT, AS SHOWN BY THE RECORDS IN THE BUREAU OF AERONAUTICS ON

MAY 31 1941

NOTE

As the Bureau s records depend upon receipt of reports from the various aviation activities, some of which are several weeks in transit, and as aircraft, which have been wrecked, lost or worn out in service, are included until officially stricken from the Navy list, it is impossible to show the actual status of aircraft on any given date.

Since the Bureau's records are changing continually any other reports not prepared at the same time, probably will not agree with this report.

INDEX

	PAGE
Aircraft in Overhaul - (San Diego, Norfolk, N.A.F., Pearl Harbor, Coco Solo, Alameda, and Seattle)	51-57
Airplanes on Hand - NAVY & RESERVES	1,2,3&4
Alameda, Naval Air Station (Operating)	49

BUREAU OF AERONAUTICS

AVIATION STATISTICS SECTION

FILE COPY

MONTHLY REPORT

STATUS

OF

NAVAL AIRCRAFT

DECLASSIFIED by authority of Op-51 on 23 July 1975 action by Blanche Snyder Op-511

THIS REPORT IS A SUMMARY OF THE GENERAL STATUS OF NAVAL AIRCRAFT, AS SHOWN BY THE RECORDS IN THE BUREAU OF AERONAUTICS ON

JUN 30 1941

S-P438

NOTE

As the Bureau s records depend upon receipt of reports from the various aviation activities, some of which are several weeks in transit, and as aircraft, which have been wrecked, lost or worn out in service, are included until officially stricken from the Navy list, it is impossible to show the actual status of aircraft on any given date.

Since the Bureau s records are changing continually any other reports not prepared at the same time, probably will not agree with this report.

INDEX

	PAGE
Aircraft in Overhaul - (San Diego, Norfolk, N.A.F., Pearl Harbor, Coco Solo, Alameda and Seattle)	50-55
Airplanes on Hand - NAVY & RESERVES	1,2,3&4
Alameda, Naval Air Station (Operating)	48

DECLASSIFIED

NAVY DEPARTMENT

BUREAU OF AERONAUTICS

MONTHLY REPORT

STATUS

OF

NAVAL AIRCRAFT

DECLASSIFIED by authority of OP-51 on 23 July 1945 action by Blanche Snyder Op-511

THIS REPORT IS A SUMMARY OF THE GENERAL STATUS OF NAVAL AIRCRAFT, AS SHOWN BY THE RECORDS IN THE BUREAU OF AERONAUTICS ON

DECLASSIFIED

JUL 31 1941

NOTE

As the Bureau's records depend upon receipt of reports from the various aviation activities, some of which are several weeks in transit, and as aircraft, which have been wrecked, lost or worn out in service, are included until officially stricken from the Navy list, it is impossible to show the actual status of aircraft on any given date.

Since the Bureau's records are changing continually any other reports not prepared at the same time, probably will not agree with this report.

INDEX

	PAGE
Aircraft in Overhaul - (San Diego, Norfolk, N.A.F., Pearl Harbor, Coco Solo, Alameda and Seattle)	52-57

* VN planes are assigned Naval Reserve Aviation Bases for elimination training. 80% will be operating - remainder in rotating reserve or overhaul.
*Personnel furnished on basis of 80% of planes assigned.
** It is improbable that these planes will actually be assigned during the period the Naval Reserve is mobilized.

NAVY DEPARTMENT

BUREAU OF AERONAUTICS

AVIATION STATISTICS SECTION
FILE COPY

MONTHLY REPORT

STATUS

OF

NAVAL AIRCRAFT

DECLASSIFIED by authority of Op-51 on 23 July 1945 action by Blanche Snyder Op-511

THIS REPORT IS A SUMMARY OF THE GENERAL STATUS OF NAVAL AIRCRAFT, AS SHOWN BY THE RECORDS IN THE BUREAU OF AERONAUTICS ON

AUG 30 1941

DECLASSIFIED

S-P438

NOTE

As the Bureau's records depend upon receipt of reports from the various aviation activities, some of which are several weeks in transit, and as aircraft, which have been wrecked, lost or worn out in service, are included until officially stricken from the Navy list, it is impossible to show the actual status of aircraft on any given date.

Since the Bureau's records are changing continually any other reports not prepared at the same time, probably will not agree with this report.

* VN planes are assigned Naval Reserve Aviation Bases for elimination training. 80% will be operating - remainder in rotating reserve or overhaul.

* Personnel furnished on basis of 80% of planes assigned.

** It is improbable that these planes will actually be assigned during the period the Naval Reserve is mobilized.

MONTHLY REPORT

STATUS

OF

NAVAL AIRCRAFT

DECLASSIFIED by authority of Op-51 on 23 July 1945 action by Blanche Snyder Op-511

THIS REPORT IS A SUMMARY OF THE GENERAL STATUS OF NAVAL AIRCRAFT, AS SHOWN BY THE RECORDS IN THE BUREAU OF AERONAUTICS ON

SEP 30 1941

DECLASSIFIED

NOTE

As the Bureau's records depend upon receipt of reports from the various aviation activities, some of which are several weeks in transit, and as aircraft, which have been wrecked, lost or worn out in service, are included until officially stricken from the Navy list, it is impossible to show the actual status of aircraft on any given date.

Since the Bureau's records are changing continually any other reports not prepared at the same time, probably will not agree with this report.

* VN planes are assigned Naval Reserve Aviation Bases for elimination training. 80% will be operating - remainder in rotating reserve or overhaul.

* Personnel furnished on basis of 80% of planes assigned.

** It is improbable that these planes will actually be assigned during the period the Naval Reserve is mobilized.

GENERAL COMMENTS ON AIRCRAFT PROGRAM

BREWSTER

F2A-3 deliveries will probably be completed during the month of November. However, shortages of essential parts will prevent final delivery of the last of these airplanes to service activities until February 1942. There are at present only 87 propellers available for 108 airplanes on this order. In addition, there has been a shortage of essential parts for the landing gear retracting mechanism. This latter situation is now clearing and will not delay fighter deliveries beyond that already governed by propeller availability. The propeller shortage has been the direct result of a serious overall shortage of Curtiss propellers which can be expected to continue throughout the year. The shortage of cylinders for the landing gear retracting mechanism is a direct result of a strike in the Air Associates Factory of the Bendix Corporation.

Production of SB2A airplanes is expected to begin in quantity late in the winter and deliveries to the Navy should be completed during the first quarter of fiscal year 1943. These planes are being produced in Brewster's new plant at Johnsville, Pa. It is the bureau's plan to put Brewster in production of F4U's as soon as possible in order to augment fighter production.

DOUGLAS (El Segundo)

Delivery of SBD-3 airplanes has been interfered with due to the failure of a subcontractor (Cleveland Pneumatic Tool) to deliver oleo struts for the airplanes. Failure to deliver the struts has been caused by a lack of essential materials at the subcontractor's factory. While some deliveries of struts in small quantity are expected during November and December, this situation will not be cleared until January, when deliveries of the strut will then meet production requirements. Efforts are being made to readjust strut production in the hope that alleviation of shortages may develop in December instead of January. Initial delivery of the follow-on order for 200 SBD-3 airplanes for the Navy is expected early in 1942. The bureau, in conjunction with Douglas, is making every effort to expedite production of SB2D-1 airplanes. Negotiations for production engineering for a large quantity of these airplanes, together with a small semi-production order of SB2D airplanes are under way.

DOUGLAS (Long Beach - Santa Monica)

Transport deliveries are expected to begin in quantity in the near future and proceed in orderly fashion. Deliveries of these airplanes to the Navy will be in advance of schedules previously prepared as a result of decisions of the Joint Aircraft Committee.

GRUMMAN

Delays in production of F4F-4 airplanes have been occasioned by difficulty in obtaining wing hinge fittings for folding-wing airplanes. Delay has been caused by a shortage of machine tools to complete processing of these fittings and further complicated by labor difficulties in the plant of a sub-

DECLASSIFIED

contractor (City Machine and Tool Company of Toledo, Ohio). Allocation of the limited production of folding wing fighters scheduled for October, November, and early December, has been made to the British. Deliveries of fighters to the Navy cannot be expected until December. Production of fixed wing fighters in the interim could not be continued due to the fact that jigs and fixtures had already been converted to the folding-wing type. The bureau has approved further plant expansion for Grumman which will lead to eventual output of approximately 75 fighters per month in the spring of 1942. Plans for production of F6F's are being actively prosecuted.

JRF production is proceeding on schedule without interference with fighters. Quantity delivery of J2F-5 airplanes is under way and it is anticipated that these airplanes will be delivered ahead of schedule in order to clear the way and train personnel for TBF production.

The XTBF is undergoing flight tests and it appears likely that deliveries of production airplanes can be expected to begin in January with full quantity production several months later.

CONSOLIDATED

Deliveries of PBY-5A airplanes have been delayed due to shortages of essential parts for the landing gear. Current indications are that these deliveries will pick up rapidly in the near future and some lost time will be regained by accelerated production in the next few months. It is premature to make accurate predictions at this time as to the availability of PB2Y-3 airplanes to the service.

MARTIN

It is anticipated that scheduled production of PBM-3 airplanes will be from one to three months behind original schedule due to difficulties being experienced in getting this large production under way.

CURTISS

Production at the Curtiss (Columbus) plant is dependent upon completion of this plant which has been delayed in the past by labor problems. It is expected that the first SO3C airplane will be delivered in December 1941 and the first SB2C late in the spring of 1942. The experimental SB2C has been used for extensive flight tests by the manufacturer in connection with production engineering and should be delivered to the Naval Air Station, Anacostia, for flight tests in the near future.

CURTISS (St. Louis)

Final deliveries of SNC advanced trainers should be completed in November and this production line is being allocated to filling urgent requirements of South American countries and Defense Aid programs.

NORTH AMERICAN (Dallas)

Production of advanced trainers at the North American (Dallas) plant is proceeding in orderly fashion and this factory, now producing in the order of 120 airplanes per month, will reach an output of approximately 400 airplanes a month next year. By virtue of allocations of the Joint Aircraft

CONFIDENTIAL DECLASSIFIED

Committee the output of this plant from 1 October 1941 to 1 January 1942 is in the ratio of two to the Army and one to the Navy. From January 1942 through July 1942, the ratio will be four to the Army and one to the Navy. These allocations will serve to alleviate serious shortages of this model now being experienced.

BEECH

Deliveries of GB-2 airplanes to the U.S. Navy have been deferred at the request of the State Department in order to satisfy urgent requirements of South American programs and it is anticipated that the remaining deliveries of GB airplanes on current contracts will be accomplished in 1942.

NAVAL AIRCRAFT FACTORY

Production of N3N airplanes continues on schedule. Following the completion of deliveries on current project orders, the Naval Aircraft Factory will deliver 300 OS2N airplanes as an interim order until production of PBN (Aircraft Factory version of Consolidated boats) can get under way. Study of possible increased output of PBN airplanes each month is now in process.

VOUGHT-SIKORSKY

Production of OS2U airplanes is proceeding at the rate of 70 airplanes per month with every indication that this monthly output can be continued to the completion of the contract. Production engineering is being continued on F4U's with a delay of one month on the original schedule as a result of the necessity for correcting unsatisfactory aileron condition.

Three S-44 (four-engine Sikorsky cargo transports) have been released for procurement and the manufacturer is proceeding on this production, utilizing existing facilities, jigs and fixtures.

VULTEE

Delivery of 25 Vultee (BT-13) per month from the Army contracts continues on schedule.

SPARTAN

The Spartan trainers are now proceeding on a revised schedule as previous difficulties experienced in the rigging of these airplanes have been corrected.

HOWARD

Indications are that the first GH (Howard stock transports) (single-engine) will be delivered to the Navy in the month of November, the remaining five on the contract to be delivered in the month of December.

BOEING

Work on the experimental XPBB-1 continues. It is still too early to accurately predict delivery of production patrol bombers from this company.

* VN planes are assigned Naval Reserve Aviation Bases for elimination training. 80% will be operating - remainder in rotating reserve or overhaul.
* Personnel furnished on basis of 80% of planes assigned.
** It is improbable that these planes will actually be assigned during the period the Naval Reserve is mobilized.

CONFIDENTIAL DECLASSIFIED

GENERAL COMMENTS ON AIRCRAFT PROGRAM

BREWSTER

There are 10 F2A-3 airplanes undelivered from the original contract. These 10 undelivered planes are having changes incorporated to increase their firing power.and it is expected that delivery will be completed in December. No additional F2A-3's are planned for procurement.

Production of SB2A's remains unchanged and the comments contained in the "October Status of Aircraft" still govern; that is, deliveries will not be made before late in the winter.

DOUGLAS (El Segundo)

The deliveries of SBD-3's are once again picking up with the shortage of oleo struts from Cleveland Pneumatic rapidly being alleviated. December will undoubtedly bring a completion of the original order of 174 SBD-3's and deliveries will commence in January on the follow-on order of 200 SBD-3's. In all probability the production of SBD-3's will be continued beyond the follow-on order of 200 due to the change in our international relations.

The bureau is continuing its efforts to get Douglas into production of the SB2D's at the earliest possible date, and as stated in the "October Status of Aircraft," funds have been released for production engineering as well as a small order to permit the Douglas Corporation to proceed with tooling, etc., in advance of the placing of large contracts.

DOUGLAS (Long Beach - Santa Monica)

The first delivery of the R4D transports will undoubtedly be realized in January.

GRUMMAN

The comments in the "October Status of Aircraft" still govern in the case of Grumman production. The Navy will receive a limited number of F4F-4's in December with deliveries starting to accelerate after January 1st.

J2F-5 and JRF deliveries are proceeding according to schedule.

CONSOLIDATED

Deliveries of PBY-5A's are being accelerated and it now appears that during the month of December approximately 35 will be delivered with follow-on deliveries according to schedules previously established by the OPM. During January and February it is believed Consolidated will make up some of the ground lost in November due to shortages of oleo struts. It is still too early to forecast PB2Y-3 deliveries.

MARTIN

Comments of the "October Status of Aircraft" remains unchanged. It is too early to predict the PBM-3 schedules with accuracy.

CURTISS (Columbus)

It now appears that Curtiss (Columbus) will not get into production on SO3C airplanes before March, with production accelerating quite rapidly when it does begin. The status of the SB2C remains unchanged, with every effort being exerted to get Curtiss into production on these SB2C's as early as possible. If this can be accomplished in the immediate future it is planned

DECLASSIFIED

to work Curtiss (Columbus) into exclusive production of this model and gradually bring another manufacturer into production of the SO3C's on completion of current orders.

CURTISS (St. Louis)

The SNC deliveries on the original contract for 150 will be completed during the first week of December. However, the Navy will receive an additional 150 of these airplanes which are being exchanged by the British for OS2U's.

NORTH AMERICAN (Dallas)

The production of SNJ's is proceeding in accordance with previous estimates and the Navy deliveries will average approximately 40 per month.

BEECH

No additional GB-2's will be received for approximately two months until the 6 which were released to the government of Brazil have been delivered. There are 10 JRB-2's on order which will not be delivered prior to April.

NAVAL AIRCRAFT FACTORY

The last 34 of the N3N's on order will be delivered during the month of December, at the end of which time the Aircraft Factory will go into production on an order of 300 OS2N's.

The Aircraft Factory is also being scheduled for a larger number of PBN's each month than under the original schedules. The new scheduling will call for 16 per month.

VOUGHT-SIKORSKY

Production of OS2U-3's continues at the rate of 70 per month with every indication that this rate will continue to completion of the contract. Production engineering is being pushed on the F4U's with the original schedule lagging approximately one month due to the need of correcting unsatisfactory aileron conditions in this model.

VULTEE

Deliveries at the rate of 25 per month continues and all indications are that this rate of production will continue to the end of the contract. There are 50 airplanes that remain undelivered on the contract.

SPARTAN

The Spartan Trainers are now in production after elimination of rigging difficulties experienced in the first planes. It is expected they will come off the line at the rate of 15 or 20 per month until completion of the contract.

HOWARD

All 6 of the Howards will probably be delivered during December. If the evaluation of this airplane by the Flight Test Section indicates that it is satisfactory for assignment to air stations for general utility and transport purposes an additional number will be ordered.

BOEING

No comments on the progress of the XPBB-1.

DECLASSIFIED

GENERAL CONTENTS ON AIRCRAFT PROGRAM

BREWSTER

The last of the F2A-3 airplanes have been delivered to Naval Air Station New York. However, twenty-two (22) of the airplanes which are at New York will not get to service activities before the first week of March. The delay is being caused by the non-availability of oleo struts for the 22 F2A-3's and by the incorporation of the Eclipse Gun sight in ten of the airplanes. Cleveland Pneumatic Tool which is supplying the oleo struts will start deliveries of the twenty-two (22) needed sets of struts on January 15 and will deliver the remainder in increments, with the last delivery scheduled for March 6.

The estimated deliveries on the SB2A are very disappointing to the Bureau and it is hoped Brewster will find the productive ability to step up his deliveries on this model. Present estimates are that first production to be appreciated in the fleet will be in April with production in numbers not to be realized before June-July. With proper production planning, Brewster could better this and the Bureau will keep urging that they bend every effort to speed along. However, production by Brewster in the past has been so disappointing and unpredictable that the Bureau hesitates in giving them benefit of a speed up.

The F3A-1 deliveries are unpredictable alone with the balance of Brewster production. It appears certain Brewster will not better Vought on production of this airplane and information available now indicates September-October as the period in which we can look for F3A's.

DOUGLAS

The original order of 174 SBD-3 airplanes has been completed except for one airplane which will be delivered the first week of January. There will be a slippage in production before we start realizing the full effect of the follow-on order for 200 SBD-3's. January will see no deliveries from this contract; February will produce two (2), March will show twenty (20), and from that point on deliveries will commence to accelerate approximately fifteen (15) additional planes each month until a peak of 85/mo. is reached. In July the deliveries will be up to 76/mo.

It is too early to estimate deliveries of the SB2D airplane. There are a number of experimental features in the airplane which are being subjected to wind tunnel tests and to flight tests on other types of airplanes. Because of the nature of these projects and possible changes in airplanes, no forecast can be given of their exact deliveries, however, present estimates from the manufacturer indicate that late in 1942 the first airplane from production will be out, with deliveries accelerating in early 1943.

First deliveries on the Douglas cargo carriers will be realized in January when we will receive approximately four airplanes. After January we will receive the transports and cargo carriers at a rate of approximately six (6) per month.

CONFIDENTIAL DECLASSIFIED

GRUMMAN

The Navy received a total of four (4) F4F-4 airplanes during the month of December and Grumman estimates he will deliver 60 of the F4F-4's in January. From now on to completion of the F4F-4 contracts barring shortages of materials the F4F-4 airplanes should be delivered to service activities at least equal to, and probably higher than, their scheduled rate of 50/mo. The shortages of folding wing fittings have been eliminated and the propeller situation now appears to be well in hand with Curtiss giving every indication of being able to meet Grumman deliveries plus reasonable spares.

No comments are offered on the J2F-5. Deliveries are meeting the schedules established for this model airplane, and they are being delivered in sufficient quantities to meet service needs.

The ten JRF's now on order will be delivered during the period June-August. No other comment.

The picture on the TBF is looking up. The first production model of the TBF is now flying, and it is estimated that January will produce two more; February ten, with deliveries starting to pick up in March, reaching 50/mo by August. The propeller for the TBF has been changed over from Curtiss to Hamilton standards. The flight tests have shown no heating difficulties exist with the Hamilton propeller and the Hamilton Standard people are in a position to meet deliveries with the required 13 foot propellers, being in production at the rate of 100/mo at the present time for British contracts. The Bureau is urging Grumman to do all to expedite TBF deliveries and has requested Grumman to move the J2F-5 delivery line at the earliest possible date to make more room for TBF production, slowing down on J2F-5 deliveries if necessary to gain a speed up on TBF's. Grumman is familiar with the urgency with which we must acquire torpedo planes, and it is believed he will get his shoulder to the wheel and produce.

CONSOLIDATED

Deliveries on PBY-5A's are starting to be of sufficient quantity to materially assist the fleet. In December 33 of the PBY-5A's were delivered and January will likely produce 40 with deliveries remaining at a rate of 40/mo. from now on.

The Navy is acquiring the 74 PBY-5A's which were originally scheduled for the Army and the airplanes are being equipped exactly similar to the Navy's own production models. The PBY-5A's which have been delivered, on order, or for which funds have been released now total 313. Production will hold steady on the PBY-5A's until a total of 219 have been delivered. Then Consolidated will shift their line to PBY-5 airplanes delivering 90 to the Navy, 150 Defense Aid to British, 12 to Netherlands. They will then deliver the last 94 PBY-5A's to the Navy at the end of which production will return to and stay with PBY-5's.

The XPB2Y-3 was delivered to the Navy in December. It is expected that the first production model will be delivered in February with two other production models to follow in May and deliveries to accelerate from then on. Barring unforseen difficulties Consolidated will meet present schedules which, however, do not call for peak production of 40/mo. until

DECLASSIFIED

March 1943. Consolidated is being urged to push their schedules up and belief is held that they will accomplish it.

MARTIN

The Bureau can not predict on Martin deliveries of the PBM-3. If they are to meet the schedules now set up for them they must accelerate over what has been done to date. There is no apparent evidence that Martin is accelerating to the point necessary to meet their schedules. Martin reports blame the delay on lack of raw materials, extrusions, corrugations, forgings and castings. The reports on the factory from Bureau personnel do not bear this out and the consensus in the Bureau is that the fault lies in productive planning. The Bureau will continue to urge Martin into speeding up his deliveries on this vital source of Patrol plane production and will immediately report any improvement in the picture to service activities. We must have Martin meet his schedules to give a balance to the patrol plane situation. With Consolidated rounding into production it is hoped Martin will move in with production to balance the operating requirements.

CURTISS

The production deliveries of SO3C airplanes will start in March and there should be a rapid acceleration in the quantity delivered each month after March. The bureau is working out a plan whereby Ryan will go into production with the SOR-1 which will be an exact duplicate of the SO3C. The change-over to Ryan is in an effort to get Curtiss into production in quantity of the SB2C as soon as possible. The change-over to Ryan will not slow SO3C deliveries because of the planning into a gradual turn over, with Curtiss staying at full capacity until Ryan is ready to meet schedules.

The loss of the XSB2C has a serious bearing on the whole picture. Priorities are being pushed upwards to permit Curtiss to deliver four of the SB2C's as early as possible. An "AA" priority will undoubtedly be required on certain machine tools and forgings to get the four airplanes as needed. It also appears a redesign of the SB2C tail will be required before production can start. No estimates can be made on the production until tests are resumed and the airplane is in readiness for quantity production.

Some opinion exists in the bureau that the fleet will not feel arrival in numbers of this airplane before midsummer. However, it is hoped that the plan to ease Ryan into the SO3C production will release some Curtiss engineering personnel and permit an all-out effort on the SB2C production with a resultant improvement of deliveries by late spring. Deliveries must start by late spring to adequately meet operating requirements of the fleet. All is being done to effect this.

North American(Dallas)

The deliveries of SNJ airplanes are coming along in accordance with established schedules. No let up on deliveries of SNJ airplanes is anticipated. North American has steadily increased production each month and the Navy deliveries from this source will undoubtedly average 40 to 50 airplanes per month from now on.

DECLASSIFIED

BEECH

The Six GB-2 airplanes which the Navy released to Brazil have been delivered and the six replacement airplanes to the Navy will be delivered prior to the first of April. Deliveries on the 10 JRB-2 Airplanes can not be predicted with any degree of accuracy at this time. However, present estimates would indicate June-July as the delivery period.

NAVAL AIRCRAFT FACTORY

The last of the N3N-3 airplanes has been delivered and the Aircraft Factory is going into production of OS2N-1 airplanes as a fill-in of productive capacity until they can start delivery of the PBN-1 airplanes. The OS2N-1 airplanes will start being delivered in January. The last report from the Naval Aircraft Factory indicates that deliveries are slipping back one month on their scheduled deliveries. If this develops to be actual delivery of OS2N-1 airplanes, it will mean 10 airplanes in February instead of in January as originally planned. The bureau will follow this closely because it is important that we receive OS2N-1 airplanes as early as possible. The OS2N airplanes are all armored and fully protected which type is urgently needed for assignment to battleships, cruisers of the OMAHA class and inshore patrol squadrons.

The PBN-1 airplanes from the Naval Aircraft Factory are now scheduled at a rate of sixteen per month when production commences. It is too early to predict the delivery schedule at this time.

VOUGHT SIKORSKY

The OS2U-3 airplanes are being delivered in excess of their scheduled rate. The schedule calls for 70 of these airplanes per month. In December 100 were delivered which included 24 for the Netherlands. Consequently the Navy received 76 of the deliveries. Vought-Sikorsky has started armoring some of the OS2U-3 airplanes in advance of their schedule to assist us in securing airplanes for Aircraft, Atlantic Fleet, and Aircraft Battle Force pools and for inshore patrol squadrons. The last 240 of the OS2U-3 airplanes were originally scheduled to be armored and protected with delivery to follow these unprotected airplanes going to training. To date 24 of the 240 have been picked up and delivered ahead of training airplanes and they are now picking up an additional quantity of 37 to receive armor and protection, for delivery ahead of training types. Of these 4 will be available in January for delivery to Aircraft, Battle Force pool and 25 during the month of February to organize one inshore patrol squadron plus added spares to Aircraft Battle Force and Aircraft Atlantic Fleet pools.

The F4U-1 airplanes is being pushed to the fullest extent by the bureau. However, it appears that the fleet will not realize deliveries of this model in the quantities necessary before summer. Vought has been urged repeatedly to do all possible to expedite deliveries on the F4U-1 because of its place in our program, being the next fighter type in line for fleet use. However, in view of the information now available it does not appear that deliveries can be expected to start prior to early summer, i.e., June and July.

DECLASSIFIED

VULTEE

Deliveries continue to be 25 per month in the SNV airplanes. Additional orders of SNV's have been placed and we will continue to receive this model at a rate of approximately 25 per month. No other comment.

SPARTAN

The Spartans will continue to be delivered at a rate of 20 to 25 per month to completion of the contract for 200. No additional NP-1 airplanes are planned for procurement and the completion of the present contract will be the last to be delivered. In view of restrictions which we have been required to place on the operation of NP-1 airplanes the Reserve Bases have been instructed to retain N3N-3 airplanes in addition to NP-1's. The original plan called for Reserve Bases to transfer one N3N-3 for each NP-1 received. However, the NP-1's will all go to Reserve Bases and will be in addition to N3N's on hand with no transfers required.

HOWARD

Six of the GH-1 airplanes have been delivered to the Navy and an additional quantity of 24 has been ordered. We can look for deliveries on the additional number to commence at the rate of approximately 4 per month in February.

BOEING

No comment is offered on scheduled deliveries of PBB-1 model airplanes. Present estimates are that the first airplane, the XPBB-1, will be delivered in March.

#01443-01512 to Inshore Patrol Squadron
#01513-01515 Unassigned

X Floats will be shipped to activites receiving airplanes marked X.
(L) Indicates landplane.
* These airplanes will be exchanged with squadrons indicated for unprotected OS2U-3 Airplanes which they have in custody. The unprotected OS2U-3's will then be sent to training as the protected OS2N-1 Airplanes

S&S

MODEL & NUMBERS	CONTRACTOR	CONTRACT NUMBER	CONTRACT DATE	ENGINE MODEL & CONTRACT NO.	NO. ON ORDER	NO. DEL'D
NOTE:	* These airplanes tentatively assigned as indicated. The 100 airplanes for Great Britain are proposed to be exchanged for 150 SNC training planes. The 30 marked for South America are unassigned to a specific country at this time, but are planned for the South American program.					
	** These airplanes were delivered concurrently with these going to training and were in excess of regularly scheduled deliveries. The two squadrons designated as VS1D16 and VS2D16 have subsequently been designated as VS1D11 and VS1D13 respectively.					
	The last 264 airplanes of this contract are scheduled to be armored, i.e., from Serial No. 5726 to 5989 inclusive. Vought-Sikorsky has been requested to select 12 airplanes between Serial Nos. 5726 to 5810 inclusive, and deliver them concurrently with the training airplanes, to permit of acquiring spares of the armored type in the immediate future for Aircraft Battle Force and Aircraft Atlantic Fleet.

* VN planes are assigned Naval Reserve Aviation Bases for elimination training. 80% will be operating - remainder in rotating reserve or overhaul.

* Personnel furnished on basis of 80% of planes assigned.

** It is improbable that these planes will actually be assigned during the period the Naval Reserve is mobilized.
